

## MITCHELL D. ERICKSON, Ph. D.

### **Mitchell D. Erickson, Ph.D.**

Science Advisor

Interagency and Special Programs Office

Science and Technology Directorate

U.S. Department of Homeland Security

**[Mitchell.erickson@hq.dhs.gov](mailto:Mitchell.erickson@hq.dhs.gov)**

Mitch Erickson facilitates DHS' Science & Technology activities with other federal, state, tribal and territorial agencies and science/technology performers. He works with appropriate inter-agency and partner organizations to integrate vertically among the various organizations and horizontally across all threats. He also evaluates current practices that could be improved by application of new technologies, models, systems, or approaches and where S&T can contribute to help close homeland security capability gaps.

Dr. Erickson has had various technical and management positions. Most recently he was the Director of DHS' National Urban Security Technology Laboratory for over a decade. Dr. Erickson's research career was in environmental science and analytical chemistry. Dr. Erickson holds one patent and is the author of over 150 technical publications, including two books--*Analytical Chemistry of PCBs* and *Remediation of PCB Spills*.

He is stationed in New York.
